

Navarre Beach Renourishment Update #2 Sand replenishment has begun!

Sand replenishment on Navarre Beach began Friday morning, April 29

Sand is now being placed on Navarre Beach for the beach renourishment project. The pumping began Friday morning, April 29 and is expected to be completed mid-June. Turtle monitoring began this week and any nests within the construction zone will be relocated per the conditions of the county's permit.

During the next week (April 30 to May 6), Weeks Marine will mobilize a second hopper dredge and continue beach renourishment, advancing past the pier to the western boundary of the Navarre Beach Marine Park, weather permitting.

For live video of the existing beach, visit www.navarrebeachlife.com. For updates and [an online map](#) of the restoration progress, visit www.santarosa.fl.gov. For questions about the process, best shelling locations, environmental concerns or timeline, contact County Engineer [Roger Blaylock](#) at 850-981-7100.
