Lanes Narrow On Avalon Boulevard

Chipley – A temporary barrier wall has been placed along the east side of Avalon Boulevard from just past the Railroad crossing overpass to Yucca Drive. North and southbound lanes have been narrowed to approximately 10 feet. This configuration will last through the remainder of this year. Variable Message Board (VMB) signs will be placed on Interstate 10 and along SR 281 to alert motorists of the narrowing lanes. Oversized vehicles are advised to seek an alternate route.

The \$5.6 million multi-lane project, awarded to Panhandle Grading and Paving of Pensacola, extends from north of the CSX Railroad Bridge to south of Mulat / Commerce Road. Improvements consist of reconstruction and widening of the existing 2-lane urban/rural roadway to a 4-lane urban roadway including: construction of storm drain improvements, a storm water retention pond, sidewalks, a mast arm signal system at Avalon Boulevard and Cyanamid Road, signing and pavement markings, construction of a frontage road on the east side of Avalon Boulevard running from just south of Cactus Drive to just north of Admirals Drive as well as minor side road improvements.
